ABOUT ME

Junior Full-Stack Developer with 2+ years of experience in .NET Core and modern web technologies. Experienced in designing, developing, and maintaining scalable web applications with clean, maintainable code. Strong background in both front-end and back-end development, RESTful APIs, and database design. Passionate about performance optimization, system architecture, and delivering high-quality solutions through effective collaboration.

PROFESSIONAL EXPERIENCE

HaPhan JSC - Full stack Developer

Jun 2024 - Present

- Full Stack Developer specializing in ASP.NET Core and IoT/RFID integration. Expert in bridging hardware and software to automate inventory and access control. Focused on building high-concurrency APIs and real-time monitoring systems that drive operational efficiency.
- Key responsibilities:
 - Automated Inventory Management: Developed an RFID-based tracking system using ASP.NET Core, reducing manual stock-taking time by 90% and increasing data accuracy to 99.9%.
 - High-Performance API Design: Optimized RESTful APIs for NFC/RFID data synchronization, cutting communication latency by 30% through efficient MSSQL query tuning.
 - Real-time Monitoring: Implemented MQTT protocols and JavaScript for live asset tracking, achieving sub-second status updates and reducing unauthorized access alerts.
 - Hardware Integration: Integrated multi-vendor SDKs to expand system compatibility with new RFID/NFC device models, increasing market reach for the product.

FPT Software - Unit Tester (Front-end base)

Mar 2024 - Jun 2024

- Quality Assurance: Executed UI/Workflow testing for enterprise-scale applications, identifying 500+ critical bugs prior to production release.
- Test Optimization: Refined Test Case Sheets and workflows, cutting regression testing cycles by 20% while maintaining 100% feature coverage.

PERSONAL PROJECTS

Book library website

Oct 2024 - Jan 2025

- I developed a web-based library platform that helps users discover and read books based on their interests. The platform includes personalized recommendations, expert chat features, AI-driven Q&A, and book reviews. It also analyzes user preferences and book trends to enhance the reading experience.

EDUCATION

Master of Information Technology

2025 - 2027

University of Information Technology

- Major in Information Technology.

Bachelor of Software Engineering

2020 - 2024

University of Information Technology

- Major in Software Engineer.

TECHNICAL SKILLS

ASP.NET Core, C#, Java

MSSQL Server, Postgre

JavaScript, HTML, CSS

Microservices, MVC, JQuery

Bootstrap, SOLID, EF Core

RESTful APIs, Agile, Github, Jira

Analytical Problem Solving

Technical Communication Quality-

Focused Mindset

ADDITIONAL INFORMATION

- Languages:** English.
- Certifications:** Vietnamese Standardized Test of English Proficiency (VSTEP) - 2024 (B2 level).
